ABOUT US

Who We Are

Anthem Global Technology Services Private Limited is a premier IT consulting, high-end solution integration, and application development firm headquartered in Bhubaneswar, Odisha.

With over 15 years of experience in executing mission-critical E-Governance projects, Documents Scanning and Digitization, we are one of the trusted agency for the Judiciary, large-scale academic and Government deployments.

We are a technology and IT services company at the intersection of deep software craftsmanship and next-generation intelligence. From building scalable, production-grade applications to deploying cutting-edge AI and machine learning systems, our team turns complex challenges into elegant, high-performance solutions — trusted by clients across industries.

Our state-of-the-art examination infrastructure spans **20,000+ sq ft** with capacity for 550 examinees simultaneously, supported by a dedicated team of over 300 professionals, including AI specialists, Blockchain experts, Unity developers, and project managers.

One of a kind achievement across India

Our Digitisation Capabilities

High-Speed Document Scanning

Industrial-grade scanners processing thousands of sheets/hour with double-read verification for 100% accuracy

OCR & Data Extraction

Optical Character Recognition converts scanned documents to fully searchable, indexed digital text

Document Management System

Customised DMS in-house developed (DSpace) with version control, audit trails, metadata-indexed instant retrieval and encrypted cold storage with AI integration for smart retrieval.

Secure Archival & Compliance

Multi-layer encrypted storage for long-term retention, RTI-ready retrieval, and statutory compliance support

Paperless Court Implementation

Scanned 25+ crore pages across the Orissa High Court and all 30 district courts, a landmark achievement in India for implementing on such a massive scale

Our Digitization Capabilities (Judiciary)

Scanning of legacy records

Successfully digitised the entire legacy case records of the High Court of Orissa, as well as for the Dist. Courts of Ganjam, Gajapati & Malkangiri in a record time, along with state and district forums of the Consumer Dispute Redressal Commission, Odisha

Scanning of the Fragile case records of the Centre for Judicial Archives, High Court of Orissa

Having experience in handling the scanning of extremely fragile records from the year 1830 via customized scanners.

Advocate Case Record Management System

A proprietary application for the advocates to access soft copies of case records during courtroom hearings.

Customized Scanning workflow solution

Having an in-house developed, fully customizable end-to-end scanning & digitization workflow solution with integrated OCR. With an API for integration with the client's native software.

Dist. Court Paperless File Management system

Currently working on developing an application which will facilitate the entire judiciary file flow system in District Courts, starting from case filing till disposal of cases, along with the integration with **CIS and JTDR**.

Our AI & ML Capabilities

Machine Learning Models

Predictive analytics engines that learn from historical examination & government data to deliver actionable insights

Natural Language Processing

AI-powered chatbot & text analysis for automated query resolution, document parsing and legal drafting assistance

Computer Vision

Real-time image & video processing for AI face recognition, automated proctoring, and OMR answer sheet analysis

AI-Powered ExamFlow Engine

Extracts structured metadata from raw documents in under 60 seconds, eliminating manual DTP and data leak risks

ADVANCED TECHNOLOGY & BLOCKCHAIN

Software & Web Development

- ▶ Java, J2EE, Python, JavaScript
- ▶ Web: ASP.NET MVC, PHP, Web API
- ▶ Mobile: iOS, Android, Windows
- ▶ Cloud Integration & DevOps
- ▶ Microservices Architecture

Graphical Simulators & XR

- ▶ Interactive Simulation Tools
- ▶ Virtual Reality (VR) Applications
- ▶ Augmented Reality (AR) Solutions
- ▶ Training & Learning Environments
- ▶ 3D Visualisation Systems

Advanced Blockchain Technology

- ▶ Smart Contract Development
- ▶ Private & Public Blockchain Solutions
- ▶ Decentralised Applications (DApps)
- ▶ Blockchain Consulting & Strategy
- ▶ Cryptocurrency Wallet & Token Dev

SOFTWARE APPLICATION DEVELOPMENT

Web & E-Commerce Solutions

Full-stack web development with ASP.NET MVC, PHP, React, and modern frameworks. E-commerce platforms tailored to business needs.

Mobile Application Development

Cross-platform apps for iOS, Android & Windows using native and hybrid development approaches for seamless user experience.

E-Governance Platforms

Mission-critical digital governance systems for census, legal, railway, and administrative workflows at national scale.

Document Management (DSpace)

End-to-end DMS solutions with OCR, version control, secure storage and audit trails for courts and govt. departments.

Analytics & Reporting Dashboards

Custom BI dashboards with deep analytical insights, item analysis, percentile rankings and real-time data visualisation.

Legal Practice Management

Comprehensive digital legal operations platform integrating case management, AI drafting assistance, and compliance monitoring.

SOFTWARE TOOLS

Data Migration Tool

An end-to-end data migration tool that makes seamless cross-platform data migration.

Annotation Tool

This is a specialized document analysis, reading, and note-taking application designed for deep research, studying, and reviewing complex texts. It breaks away from standard, page-by-page PDF readers by introducing a parallel, multi-touch virtual workspace alongside your documents.

ExamFlow — End-to-End Assessment Platform

PRE-EXAM

- AI-powered question extraction in 60s
- Secure question bank management
- Candidate database integration
- Dynamic Admit Card generation

EXAM DAY

- Zero-latency local intranet delivery
- AI face recognition proctoring
- Webcam & clipboard monitoring
- OMR / subjective offline support

EVALUATION

- Automated objective answer processing
- OMR double-read verification
- On-screen marking for subjective
- Secure encrypted data transfer

POST-EXAM

- Item analysis & percentile rankings
- Shift-wise score normalisation
- CCTV compilation within 7 days
- Customised result export reports

OUR PRODUCTS & SOLUTIONS

Document Management System

Based on DSpace (Latest Version)

Enterprise-grade DMS with version control, OCR indexing, encrypted archival, audit trails, and instant metadata-based retrieval. Deployed across courts & Govt. departments.

e-Office Application

Paperless Office Automation

Digital workflow solution for Government offices and the Judiciary, enabling file movement, approvals, correspondence tracking, and the complete elimination of physical paper processes.

OCR Application

Optical Character Recognition Engine

High-accuracy OCR engine that converts scanned documents, images and PDFs into searchable, editable digital text with support for multiple Indian & regional languages.

HRMS

Human Resource Management System

Comprehensive HR platform covering employee lifecycle, attendance, payroll, leave management, appraisals, and compliance reporting for organisations of all sizes.

Law Firm Management App

Advocate Practice Management Platform

End-to-end legal operations platform — case lifecycle management, litigation tracking, AI-assisted drafting, client portal, deadline management & compliance monitoring.

e-Judiciary Application

Digital Court Management System

Comprehensive platform for courts to manage case filing, hearing schedules, orders, cause lists, and eCourts integration — enabling fully paperless judicial operations.

Scanning Workflow Application

High-Volume Document Scanning Suite

End-to-end scanning workflow with batch processing, quality verification, indexing, and automated upload to DMS — processing thousands of sheets per hour and can also be customised as per the project requirement

OUR PRODUCTS & SOLUTIONS

Judiciary Digitisation

Court Records & Legal Infrastructure

- ◆ High Court & district court digitisation initiatives
- ◆ Records archival modernisation across Odisha judiciary
- ◆ Hybrid physical-digital document management systems
- ◆ eCourts integration & digital cause list management

Enterprise & Govt. Digitisation

Public Sector Records Modernisation

- ◆ Large-scale scanning & digitisation programmes
- ◆ Public sector records modernisation at state & national level
- ◆ Information governance initiatives for Govt. departments
- ◆ Paperless office transformation for courts & PSUs

Secure Information Governance

Compliance-Driven Records Management

- ◆ Judicial records management with tamper-proof audit trails
- ◆ Secure archival workflows with multi-layer encryption
- ◆ Metadata tagging, OCR indexing & intelligent retrieval
- ◆ Compliance-oriented document lifecycle management

Future-Focused Digital Infrastructure

AI-Powered Intelligent Systems

- ◆ AI-enabled document retrieval & intelligent search systems
- ◆ Legal information intelligence & NLP-driven analysis
- ◆ Digital archival ecosystems with long-term preservation
- ◆ Workflow automation platforms for legal & Govt. processes

KEY PROJECTS & ACHIEVEMENTS

Paperless Court — Orissa High Court & 310 District Courts

Scanned over 25 crore plus pages across all benches of the Orissa High Court and 310 lower courts in all 30 districts of Odisha. A landmark, one-of-a-kind achievement across India.

LANDMARK

National E-Governance Programme — India

Contributed to high-profile national projects including census data collection, legal document digitisation, and railway management systems under India's National E-Governance initiatives.

NATIONAL

Paperless Court — State and 30 District Forms of Consumer Dispute Redressal Commission, Odisha

Successfully implemented and supporting the Paperless court in all State and 30 District Forms of Consumer Dispute Redressal Commission, Odisha.

Consumer Court

Scanning of administrative files for implementation of Odisha State Workflow Automation System (OSWAS) & Odisha Judicial Workflow Automation System (OJWAS)

Scanned over 12 crore pages across all 40 administrative departments of the Government of Odisha and the High Court of Odisha

STATE
GOVERNMENT

DMS Implementation — District Courts & Consumer Forums

Successfully deployed Document Management Solution (DSpace) in 4 District Courts, the State Consumer Dispute Redressal Commission, and multiple District Forums.

LEGAL TECH

WHY CHOOSE ANTHEM GLOBAL?

Proven Security Track Record

Zero data breach history across 30,000+ exams. Multi-layer encryption, AI proctoring, and CCTV archival as standard.

Trusted by Judiciary

Exclusive partner of the Orissa High Court for over a decade. Paperless court implementations across 310 courts in 30 districts.

AI-First Approach

Our ExamFlow AI engine eliminates DTP operators and manual leak risk—extracting question banks in under 60 seconds.

National-Scale Experience

Executed census data management, railway systems, and legal digitisation under India's National E-Governance programme.

Own Infrastructure

20,000+ sq ft exam facility in Bhubaneswar with 750-seat capacity — no dependency on external centres.

Sustainability Focus

Digitisation efforts reduce paper usage across courts, universities and government offices — promoting eco-friendly practices.
